

zLinq helps customers own the success of their voice, data, contact center, and mobility investments by providing comprehensive visibility across their communications environment. Our Customer Dashboard is a real-time window into your infrastructure, allowing you to manage costs, align priorities, and take decisive action.

Metrics Widgets deliver a snapshot of important information including orders, savings, and access to the zLinq Visualizer.

Summary Widgets provide at-a-glance views of assets by provider and category as well as savings by year and category.

Data Widgets provide granular information about assets and savings with advanced filters which can be customized based on the priorities of your business.

- ✔ Use advanced filters to customize the view: by Status, State / Province, Location, Provider, and Asset Category.
- ✔ View asset details or savings details.
- ✔ View actions performed by zLinq team in asset or savings record notes.

The zLinq Advantage

Visualize your environment in full context

Our Visualization Toolkit collects, analyzes, and decodes your infrastructure data in near-real time for IT action.

Align people and departments around top priorities so they collaborate instead of compete

Integrated consulting & support that works for, and across, all impacted teams.

Execute with purpose without having to take on all the work

A risk-sharing partner model that takes on the burden of change and guarantees results.

**We own the effort.
You own the success.**
