

zLinq helps customers own the success of their voice, data, contact center, and mobility investments by providing comprehensive visibility across their communications environment. Our Customer Dashboard is a real-time window into your infrastructure, allowing you to manage costs, align priorities, and take decisive action.

**Summary Widgets** provide at-a-glance views of assets by provider and category as well as savings by year and category.

**Metrics Widgets** deliver a snapshot of important information including orders, savings, and access to the zLinq Visualizer.

**Data Widgets** provide granular information about assets and savings with advanced filters which can be customized based on the priorities of your business.

"With our diverse network, [zLinq] Lifecycle Management gives me a solid place to look for anything related to one of my sites. It allows me to look at my total spend per site to see if there are options for reducing costs."

- 100-Location Financial Institution

"I love working hand in hand with zLinq. Their platform is easy to use and provides a high level view of everything at each one of our branches to ensure that we don't have duplicates of services we might not need."

- 126-location Financial Institution

## Summary Widgets

**Assets – Summary** shows the total number of assets in states, provinces, and locations served by different providers in multiple asset categories.

**Savings – By Years** shows cumulative savings since inception, savings achieved during the current year, and savings across previous years.

**Savings – By Category** shows savings by category (Disconnect, Price Reduction and others) since inception in descending order.

**Assets – Details** shows total spend by provider in descending order and total spend by asset category in descending order.

## Metrics Widgets

**zLinq Visualizer** shows asset distribution across physical locations by type and provider.

**Additional widgets** show a snapshot of important information including: Disconnects, Orders, Services, Invoices, Project Status, and Savings.

- Use advanced filters to customize the view: by Status, State / Province, Location, Provider, and Asset Category.
- View asset details or savings details.
- View actions performed by zLinq team in asset or savings record notes.

## The zLinq Advantage

### Visualize your environment in full context

Our Visualization Toolkit collects, analyzes, and decodes your infrastructure data in near-real time for IT action.

### Align people and departments around top priorities so they collaborate instead of compete

Integrated consulting & support that works for, and across, all impacted teams.

### Execute with purpose without having to take on all the work

A risk-sharing partner model that takes on the burden of change and guarantees results.

**We own the effort.  
You own the success.**
